4/4/2012	Apple training professional development for my faculty. Facilitated, planned and executed 2 successful day-long and extensive professional development classes- April 4 th Macbook (8 Hours)	5.2	<p>Teachers were given the opportunity to learn from an experienced apple trainer about how to integrate technology into the classroom. This class just wasn't about learning skills but methods to use, collaborate and share ideas with teachers and students. The standards state that "Candidates develop and implement technology-based professional learning that aligns to state and national professional learning standards, integrates technology to support face-to face and online components, models principles of adult learning, and promotes best practices in teaching, learning, and assessment." This training class gave them the opportunity to learn how to integrate and work with other teachers to gain that integration knowledge to make our 1:1 program successful now and in the coming years. This field experience helped me to learn what my faculty need in training as well as how to help them in the future by assessing each of their knowledge of technology and what I will need to do for each of them in the future.</p>
